PROJECTS

- **Skill Map** : A dynamic online platform designed to empower college students on their educational journey. Founded with a passion for guiding and mentoring the next generation, Skill Map is dedicated to providing invaluable resources and personalized assistance to help students thrive academically and beyond. [Link](#)
- **GEHU NSS WEBSITE**: The website I designed encapsulates the essence of the NSS program, highlighting its core values of social responsibility, compassion, and active citizenship. Through thoughtful design and user-friendly features, I aimed to create an engaging online space that inspires and informs both current and prospective NSS participants. [Link](#)
- **Weather Whiz** : A website that provides real-time weather information to users. This innovative platform utilizes cutting-edge technology to deliver accurate and up-to-date weather data from various reliable sources.
- **Catalogue App**: A Simple shopping app made using Flutter with all the prominent features like add to cart, login, dark theme and gestures.
- **Blood Bank Database Project** : Created a database for efficient management of a blood bank chain. Made ER diagrams and then converted them to relational database and used normalization to remove the data redundancy and improve the efficiency of the database.

Skills

C, C++, Java, SQL, JavaScript, Node.js, React.js

SCHOLASTIC & CO-SCHOLASTIC ACHIEVEMENTS
